UI/UX CASE STUDY · COMMUNITY LEARNING APP

Learn together. Act together. Build a better tomorrow.

An educational social app where Gen Z collaborate, share what they know, and learn and grow as a community.

ROLE	TIMELINE	TOOL	PLATFORM
UI/UX Designer	32 hours	Figma Make	iOS, Android & desktop, including tablets

01 Overview

The problem

Most social feeds reward endless scrolling, not growth. Young people who want to learn and make a difference have few spaces built for doing that together.

The goal

Design a social space where every interaction helps someone learn: collaborate on ideas, share knowledge, and grow toward a better tomorrow.

My role

End-to-end design: concept, user flows, information architecture, visual and interaction design, and the interactive prototype in Figma Make.

02 The core experience

Four ideas shape every screen. Together they turn a social feed into a learning loop.

Collaborate

Work on ideas and projects with peers instead of alone.

Share

Post what you know so others can learn from it.

Learn

Pick up new skills from the community's shared knowledge.

Grow

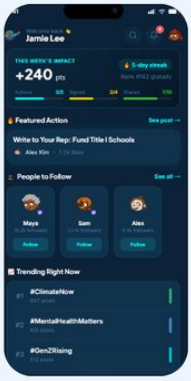

Build skills and impact over time, for a better tomorrow.

03 Brand direction

The logo sets the tone for the whole app: energetic, optimistic and inclusive. Each element carries a message.

Diverse group	A community where everyone belongs	**Megaphone**	Every member has a voice worth sharing
Globe	Learning that serves a better world	**Rising arrows**	Momentum and personal growth

04 Key screens & design decisions

HOME

Familiar from day one

Home borrows patterns from apps Gen Z already use: a bottom tab bar with a center create button, people to follow, trending hashtags and notifications. Nothing to learn first, so users feel free to explore, learn and share.

EXPLORE

Topics first, people follow

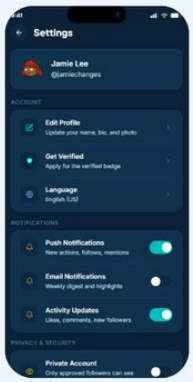

Explore puts topics up front as large, color-coded cards, from Climate to Tech. One tap opens a topic, and users can immediately start following the people who post about it.

PROFILE

A profile that grows with you

A familiar social layout: avatar, bio, followers and following. Badges and an Impact Score sit alongside, encouraging users to build their identity and keep learning.

SETTINGS

Full control, so users feel safe

Deliberately detailed: edit the profile, delete the account easily, block users, and choose how much others can see. Clear privacy controls help users feel free and safe.

05 Visual identity

Colors drawn from the logo. Deep navy carries text for strong contrast; the bright brand colors are used for energy and emphasis.

Deep navy	Action blue	Sky cyan	Spark yellow	Energy orange	Pop pink
#0B1F4D	#1F5BD6	#20B8F0	#FFC21A	#F7841E	#E8318A

06 Outcome & next steps

What this project shows

- **Product thinking:** reframing social media as a learning loop
- **Community design:** features built around collaboration
- **Brand-led UI:** one bold identity carried into every screen
- **Prototyping:** a working, clickable concept in Figma Make

What I'd validate next

- Usability tests with Gen Z users
- Moderation and safety tools for a young community
- How to measure real learning, not just engagement
- A full WCAG accessibility audit of the app screens
